### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Pugliese, US Patent Application Publication 2005/0033634.
2. Pugliese teaches a parking facility comprising a multitude of parking spaces for individual cars. See figure 3. Each parking space contains a terminal device which includes a printer 84 for printing the individual parking space identification information such as the parking lever, aisle and space number. See paragraph 0049. The identification information is printed on a removable ticket that the owner of the vehicle can take with him or her.
3. With respect to claim 4, the terminal device 40 corresponds to the claimed retention means.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pugliese in view of Currier, US Patent Application Publication 2005/0258632. Currier teaches a

printer located in a parking lot or garage which print parking location reminders 46. The reminders 46 having parking space location or identification information thereon and have advertisement information thereon. See paragraph 0021.

6. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pugliese in view of Capuano, US , US Patent Application Publication 2005/00228583. Capuano teaches a system 1 for dispensing paper 2a. The paper “may describe both the location of the vehicle (according to whichever color, character, alphanumeric or other identification system the parking lot or garage uses), a simple map illustrating how to best reach that spot from one or a number of parking-utilizing destinations, and contain an advertisement”. See paragraph 0024. It would have been obvious to one having ordinary skill in the art at the time this invention was made to construct the parking space identification ticket taught by Pugliese with color codes and advertisement as taught by Capuano to provide a means to locate a vehicle according to the color identification system used by a parking lots and to provide advertisement to provide a means to generating additional revenue for the parking lot owners.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pugliese in view of Langwell, US Patent 4572380. Langwell teaches a pad and holder comprising a support sheet 1 attached to pad having a plurality of removable sheets, wherein the support sheet 1 hangs from a hook 60. It would have been obvious to construct the terminal device taught by Pugliese with a pad of removable sheets supported on a hook as taught by Langwell provide a more economical or inexpensive means of providing parking location identification means.
